About the DLA Final Conference

DLA is an INTERREG IVC project focused on improving regional policies in the fields of Information Society through the introduction of the Digital Local Agenda (DLA) in order to facilitate the integration of the Information and Communication Technologies (ICT) with the Local Public Administration services and daily activities.

The Conference represents the final act of a three-years project period where DLA partnership, composed by 11 partners coming from 9 different EU countries, jointly worked for exchanging experiences and providing a Common Methodology for facilitating the building of a digital local agenda in a whatever EU local administration.

The DLA Project Final Conference aims to point out the Digital Local Agenda as a suitable instrument for supporting the growth of Smart Cities and Communities in the EU according to the strategies promoted by the EC through the new Horizon 2020 framework: together with the presentation of the project final results, the panel discussion will be focused on the exchanging of experiences on "how to build a DLA ..." including ongoing regional/national strategies and running activities performed at local/municipality level for its development.

DLA è un progetto INTERREG IVC che ambisce a migliorare le politiche regionali nel settore della Società dell'Informazione attraverso l'introduzione della Agenda Digitale Locale (DLA) nell'ottica di facilitare l'integrazione delle Information and Communication Technologies (ICT) con i servizi e la quotidiana attività della Pubblica Amministrazione Locale.

La Conferenza rappresenta l'atto finale di un periodo progettuale di tre anni nei quali il partenariato di DLA, composto da 11 soggetti provenienti da 9 paesi EU differenti, hanno operato di comune accordo scambiandosi esperienze e proponendo una Metodologia Comune che facilitasse la costruzione di una agenda digitale in una qualunque pubblica amministrazione locale europea. La Conferenza Finale di DLA indica la Agenda Digitale Locale come lo strumento più adatto per sostenere lo sviluppo delle Smart Cities and Communities in Europa in sintonia con le strategie promosse dalla CE attraverso il programma Horizon 2020: oltre alla presentazione dei risultati finali del progetto, il confronto sarà orientato sul tema di "come costruire una Agenda Digitale ...", attraverso le attuali strategie regionali/nazionali e le attività in essere a livello locale per la sua implementazione.
